

America a strong and caring country—traditions such as legislative action, family values, citizenship, stewardship and community service.

Exemplifying commitment to those traditions are ten members of the Grange in Danville who will be honored for their many years of continuous membership when Valley Grange celebrates its 100-year milestone with a dinner at the Grange Hall on April 3.

I am pleased to join their fellow Valley Grange members in honoring the following people, who will be presented with certificates and pins for their dedication: Hazel Savage, 75 years; Sarah Kreisher and Clyde and Ruth Krum, 70 years; Lansford Steininger, 60 years; Robert George, 55 years; and James and Lois Hagenbuch, Dorothy Keefer and Minor Leighow, 25 years.

Mr. Speaker, it is people like these ten members of Valley Grange who help to keep rural America strong, and I am proud to wish them and their fellow members a happy 100th anniversary.

2000 EMERGENCY SUPPLEMENTAL APPROPRIATIONS ACT

SPEECH OF

HON. ED WHITFIELD

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 2000

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3908) making emergency supplemental appropriations for the fiscal year ending September 30, 2000, and for other purposes:

Mr. WHITFIELD. Mr. Chairman, I applaud the House's adoption of the amendment to H.R. 3908, the Emergency Supplemental Appropriations Act, offered by my colleague, the gentleman from Arkansas, Mr. HUTCHINSON.

My District is currently struggling with an explosion in the use, distribution, and production of methamphetamine. The number of methamphetamine incidents in the First District of Kentucky is estimated to be one of the highest in the country.

The outbreak of clandestine meth labs is creating a tremendous burden of local law enforcement agencies, especially in rural areas with small police departments. Methamphetamine investigations are time consuming and require unique techniques and specialized equipment. Law enforcement officers in making a meth bust cannot simply arrest the suspect or suspects; they must be certified to dispose of these volatile and hazardous chemicals.

This amendment will reallocate much needed funding to DEA for cleanup of hazardous materials at clandestine methamphetamine laboratories. The funds available to DEA for lab cleanups were recently exhausted.

Western Kentucky was fortunate enough to receive a \$1 million earmark for methamphetamine eradication and cleanup. However, we could still experience a funding shortfall based on statistics provided to me by DEA. During Fiscal Year 1999, there were 58 meth lab cleanups in the State of Kentucky; 50 were in my District. During the first quarter of this year, there were 25 meth lab cleanups in Kentucky and 20 were in my District.

This is a serious problem we can't ignore.

GRANTING CHINA PERMANENT
NORMAL TRADE RELATIONS
(PNTR)

HON. JOSEPH M. HOFFEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 30, 2000

Mr. HOFFEL. Mr. Speaker, a great nation has to stand on its principles. If it fails to do so, it is diminished. The Cold War and our policy toward South Africa are just two examples of policy based upon our nation's bedrock principles. Such an opportunity will apparently present itself this year with the anticipated vote in Congress on granting permanent normal trade relations (PNTR) with China.

After months of studying the issues; after dozens of meetings with various groups and individuals on both sides of the issue, such as the Chinese Ambassador to the United States, business leaders from Montgomery County, human rights activists and labor leaders; I have decided to oppose granting PNTR to China at this time.

Fair trade and economic growth in this new economy are very important to me, but not at the expense of the principles for which this country stands.

I remain committed to free and fair trade. I cosponsored and voted for the Africa Growth and Opportunity Act in both the International Relations Committee and on the floor of the House, and I hope to vote for it again when it is reported out of conference committee. I also cosponsored another free trade measure for Africa called the "Hope for Africa Act." Last year, I supported granting a one-year extension of normal trade relations (NTR) with China. I support a comprehensive engagement with China that includes free and fair trade, but only after China has demonstrated a willingness to become a responsible member of the world community.

By granting China PNTR, we surrender the only effective economic and political tool to effect positive change in China—the annual vote to renew NTR. Without this, China has little reason to improve its actions and image in the world community.

There have been too many broken promises by the Chinese government. There are too many protesters in prison. There are too many religious persecutions. There are too many military threats.

China's record on human and workers' rights continues to be abominable. Take for instance the story of Liu Baiqiang. While serving a 10-year sentence for theft, Baiqiang, in support of the 1989 pro-democracy movement, wrote messages calling for freedom and the end of tyranny on scraps of paper and released them into the air attached to the legs of locusts. For this he was sentenced to an additional eight years in prison.

The leadership in China continue to threaten Taiwan, even at a time when we are considering PNTR, just because Taiwan practices democracy. China continues to develop and contribute to the proliferation of missile and nuclear technology, exporting it to rogue nations around the world. China continues to violate environmental standards for development and industry, ignores fair labor standards and

safe working conditions and uses child, low wage and even slave labor to produce many goods for export.

Finally, China has yet to live up to any of the previous trade agreements it has signed with the United States. I am not convinced that China will be any more likely to change this behavior once it is granted PNTR status.

I firmly support a renegotiation of the terms of the U.S.-China bilateral treaty that would provide greater safeguards against Chinese abuses and outlaw behavior. I have participated in two working groups established by Members of Congress that are striving to identify the issues that should be renegotiated and ways to initiate the renegotiation.

A treaty that provides a free and fair trade agreement with safeguards that could better guarantee appropriate Chinese behavior in the world community would receive my full support.

Granting China PNTR now might be economically rewarding, but it would be morally bankrupting.

NATIONAL WESTERN AGRICULTURE FORUM

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 30, 2000

Mr. SCHAFFER. Mr. Speaker, prior to the start of the second session of this 106th Congress I held a widely attended agriculture forum at the 94th Annual National Western Stock Show in Denver, Colorado. The forum featured twelve experts who presented their views on three of the most challenging issues facing agriculture—biotechnology, international trade and federal farm policies.

I will now summarize the remarks of the panelists and commend to our colleagues the opinions shared at the Colorado forum.

The first panel addressed biotechnology. Mr. Roger Bill Mitchell, President of the Colorado Farm Bureau, began by addressing the overriding concern of the biotechnology panel; consumer awareness. "Consumer acceptance is the key to biotechnology's success. Currently, the public is misled by propaganda . . . if the benefits of biotech were put forth then the public would support the technology," he said. "It is up to the farmer and rancher—us—to market biotech products and to educate the public. We have to respond to the markets. Even when the consumer is wrong, he's right."

Dr. Cecil Stushnoff, Director of Horticulture at Colorado State University said the term "genetic engineering" evokes suspicion and fear. "A gap of knowledge generates fear of the unknown. The public should be informed that biotechnology could help in stopping viruses, killing insects, serving as vaccines, and preventing disease," he said.

Dr. Stushnoff said the public should also be advised of the risks to human health and to the environment. "The only way to ensure public support is to assess each product on a case-by-case basis. More research in this field is needed to answer consumer questions. Biotechnology has enormous potential." Dr. Stushnoff also warned of foreign nations that, as a matter of national policy, have promoted campaigns of hysteria regarding genetically
